Admin services listed above with no exclusion criteria will appear on the report if they are the most recent admin service.

This report identifies customers whose most recent service occurred between the selected start date and N number of days before the report run date (data date). The most recent service is drawn from both supportive (general) and job services that are OSCCAR approved; the most recent admin service is determined separately. Customers whose most recent service is entered employment have been excluded from the report, but customers who entered employment during the specified period, but who have received a service since then, are shown with a yellow background and their job start date is also shown. In addition, certain supportive services that are not OSCCAR approved have been allowed in the report in order to help the user determine whether contact makes sense. These services are limited to outcome/enhancements that have the following results: Moved from Area, Lost Child Care, Substance Abuse or Dependence, Retired, Relocated to Mandated Residential Program, Health/Medical, Entered Military Service, Institutionalized, Family Care, Lacks Transportation, Cannot Locate, and Reservist Called to Active Duty. Customers whose most recent service falls into one of these outcomes are shown in bold italic. In addition, customers who have a recorded outcome of "Deceased" have been excluded from the report.

The selected start date will limit the customers shown to those who have received a service (job, support, or admin) sometime since that date. The user then enters a number indicating the number of days that have elapsed since the customer's last service. If the user enters a "0", the report will return all customers who have received a job or support service since the start date, but whose last service is not an entered employment. All admin services since the start date will be shown except customers with one of three services identified above occurring since today's date - {?N} days are excluded from the report, as are customers with the two other specified admin services. Thus, the report can be used both for contacting people who have not recently used the centers to encourage their return, and also to contact people to determine whether they have recently entered employment and to collect placement information.

**Report Run Times:** About 5 minutes.

**Report Feedback:** This report has been tested for accuracy; however, we encourage your feedback--if you get unexpected results or have other suggestions, please contact the report developer below.

**Report Developer:** Linda Bass, lbass@detma.org, 617-864-1570.
