

Enrollment Demographics-Program-F1

Development Version: Crystal Reports XI, Service Pack 2

First Issuance Date: 11/15/06

Modification (2/11/07): Changed to show 1 decimal in percentages.

Parameters: Location Level (Site, Career Center, Region), Local Office, Career Center, Region, Program, Fiscal Year, Report End Date, New Enrollees or All.

Parameter List of Values Updated Date: 2/11/07 - added JSJR.

Key Features: The Enrollment Demographics-Program report can be used for most programs which are not specific to a career center. The report can be run by region, career center, or site, either for all enrollees or for new enrollees this fiscal year.

The report is based on all customers who are program participants during the report period, including carry-ins (if "All Enrollees" is chosen) and new customers. Because the report does not rely on services delivered during the report period, but instead selects customers who have not yet been terminated or who are terminated during the report period, it will include customers who may not have received services recently, but who were not terminated from the program at a more appropriate time.

The report is organized by fiscal year, but should not be run for previous fiscal years, except for the prior year and then only if the current date is between July and December of the current fiscal year, since records may be archived after 18 months. The user can select a report end date within the fiscal year to allow the user to look at data as of the end of a month instead of year-to-date.

Report Run Times: Anywhere from 10 minutes (about 100) to 40 minutes (250), depending upon the number of enrollees.

Report Feedback: This report has been tested for accuracy; however, we encourage your feedback--if you get unexpected results or have other suggestions, please contact the report developer below.

Report Developer: Linda Bass, lbass@detma.org, 617-864-1570.
