

## General Program Report - X2

**Development Version:** Crystal Reports XI, Service Pack 2

**First Issuance Date:** 8/14/06

**Modification 1 (9/09/06):** Removed requirement for double entry of program parameter; changed parameter prompt text; changed selection formula to use indexed fields; added separate parameters for site, career center, region for speed; removed option for multiple values for these parameters, again for speed; added a parameter to allow report to be run for case specific case managers.

**Modification 2 (10/26/06):** Required the parent followup ID to be null for the summary job placement count.

**Modification 3 (2/11/07):** Changed retention to show date of retention instead of "Y", to show "N" if not retained, or "Other-N" if the retention is for a period other than 30-days (or 90-days for MRC/MCB), or blank if retention has not been determined. Added JSJR program.

**Modification 4 (2/18/07):** Adjusted grouping to allow multiple retentions with the same value but for different parent jobs to appear, and to exclude followup retentions = "Y" for periods other than 30-day retention (90-day for MRC/MCB).

**Modification 5 (4/16/07):** Fine-tuned running total and other formulas.

**Parameters:** Location Level (Site, Career Center, Region), Local Office, Career Center, Region, Program, Fiscal Year, Report End Date, Report Type (Summary or Detail), Case Manager (if you wish).

**Parameter List of Values Updated Date:** Case managers: 4/13/07.

**Key Features:** The General Program Report can be used for most programs which are not specific to a career center. The report can be run by region, career center, or site, either as a summary or as a detail report with summary information. If you wish, you may run the report so that it shows only those program enrollees assigned to a specific case manager; the report would then complement the Caseloads Program Report, by showing the employment information and course information for customers being case managed.

The report is based on all customers who are program participants during the report period, including carry-ins and new customers. Because the report does not rely on services delivered during the report period, but instead selects customers who have not yet been terminated or who are terminated during the report period, it will include customers who may not have received services recently, but who were not terminated from the program at a more appropriate time. **Note that if customers are enrolled and exited from the program multiple times during the report period, that the report will only be based on data related to the current status; this situation is only likely to arise for the JSJR Program.**

The report is organized by fiscal year, but should not be run for previous fiscal years, except for the prior year and then only if the current date is between July and December of the current fiscal year, since records may be archived after 18 months. The user can select a report end date within the fiscal year to allow the user to look at data as of the end of a month instead of year-to-date. Data for the previous months or the previous fiscal year will reflect the status of customers as of the report end date (either the selected report end date or the end of the selected fiscal year).

Enrollments are grouped by enrollment status (carry-in or new) and by active or terminated status within those groups. Employment information is shown for any jobs obtained during the program participation period, but summary counts are shown only for jobs obtained during the report period. Those jobs obtained while enrolled in the program, but prior to the report period are shown in Bold Italic, and do not contribute to counts. **Note that the report is designed to show jobs that have no job retention info collected or have 30-day job retention collected (either "Y" or "N"); if a later followup shows the job was lost, the job will appear a second time with an "Other-N" shown in the retention column. Note that followups that are "Y" for periods other than initial 30-day followup are not shown, so if a job should show retention, but it does not, it may be because the job retention was done using either "Periodic" or some other followup period, instead of 30-day retention (or 90-day for MRC/MCB); in order to make the retention appear, enter 30-day followup information in MOSES. Note also that second jobs that are entered in the followup screen of an earlier job in order to show continuity of employment are not shown--only the parent job will appear.** Training information (course enrollment) is displayed and counted for all participant activities while enrolled (regardless of funding source), including training prior to and during the report period. Training activities completed prior to the report period are shown in Bold Italic.

For employment information, counts are for people not cases, i.e., a customer who gets two jobs within the report period is counted only once. For job retention, a customer is counted if he/she has at least one 30-day retention recorded, but is only counted once in the summary even if there are multiple 30-day retentions. The retention variable is based on 30-days for all programs but MRC and MCB; for the latter two, retention is based on 90-days. Note that "periodic" retentions or retentions for other time periods are not counted in the summary.

For training information, a customer who participated in more than one training program is counted only once; however, completion status is counted for each training program per customer, so that the sum of completion statuses will exceed the number of course enrollments if some customers participated in more than one course during their program enrollment period.

**Report Run Times:** Anywhere from 12 seconds to 3 to 5 minutes.

**Report Feedback:** This report has been tested for accuracy; however, we encourage your feedback--if you get unexpected results or have other suggestions, please contact the report developer below.

**Report Developer:** Linda Bass, lbass@detma.org, 617-864-1570.
