

Title I Participant Outcomes-G

Revised Version: Crystal Reports XI, Service Pack 2.

First Issuance Date (revision of 2001 report): 2/20/07

Modification (3/4/07): Added additional summaries, training-related column.

Modification (3/25/07): Numerous adjustments, including display of retention and start dates, change from basing counts on SSNs to counts based on applicant IDs, and addition of summaries at multiple group levels.

Modification (6/18/07): Changed record selection to allow Boston CBOs to be included if Boston is selected for the region.

Modification (7/25/07): Changed record selection to include customers who terminated after the report end date; changed formulas and running totals so that only outcomes that occur within the report period are shown and counted in summaries.

Parameters: Region, Funding Source, Fiscal Year, Report End Date.

Parameter List of Values Updated Date: N/A.

Key Features: This report shows all Title I enrollees (Youth, Adults, or Dislocated Workers, based on the funding source selected), along with any outcomes they may have earned to date. Note that summaries are based on applicant IDs, so that any customers with multiple (different) applicant IDs will be counted more than once. **Note that the outcome summaries are based only on those customers who have terminated**, with the exception of the earned credential summary. The detail of the report will show entered employment/outcome information regardless of termination status, but these will only be counted in the summaries after program termination. Note that wage information is based on wage at placement only (not at followup), and that the average wage is based on the wage at placement of the most recent job per customer. Note also that 30-day retention is based on 30-day retention data only. For retentions during the year following exit, see the **"Follow-up Retention History"** report. Retentions collected at other followup periods (periodic, 3-month, etc.) are not shown. The training-related field reflects what has been entered in MOSES as training-related, although results of "N/A" are excluded from the Training-Related Rate. All rates shown are based on non-exclusion exits. The attained credential field identifies those customers who earned a high school diploma or equivalent or a recognized credential.

The report is broken out by region, career center, and program, with summaries at each group level that also include crosstabs of exit outcomes.

Please note that the summaries in this report are intended to assist the user in gauging current WIA performance; however, the summaries are not identical to those used for formal WIA Performance, which is based on UI wage records, not on data entered into MOSES.

Report Run Times: A few seconds/minutes.

Report Feedback: This report has been tested for accuracy; however, we encourage your feedback--if you get unexpected results or have other suggestions, please contact the report developer below.

Report Developers: Les Abramowitz, labramowitz@detma.org, and Linda Bass, lbass@detma.org, 617-864-1570.
